- LaughGuru is an startup of an IITB alumni and this organisation works in improving the quality of education in our society by providing education in entertaining way. I am working for brining people to this wonderful platform and to increase its popularity.

PROJECTS

Chat-Bot (College Enquiry)

A chat-bot is also called as Talk-bot which works as it takes some text as input and searches for that pattern in the database and returns the result as text on the display (may be a web-page).

Appointment management system

The proposed system will read message app and text messages of social networking sites logged in your system and manage appointment calendar for you. Before one hour of the event the system will send alert.

Library Management Web-Tool(IITM)

In this project I have designed IITM complete website with new features like Library Management (Student's login, Teacher login, Admin's login) and forgot password many new features like this for complete maintainance of IITM administration smoothly.The library Management Allows IITM community to access the Library remotely.

Blog-Website (BlogShare)

This is my first website which I made during my 1st year summer-vacation (completed in 3 months) with the help of CMS and other tools (HTML, CSS, JS, PHP). This website includes news, entertainment news, shopping coupons, travelling coupons, and many more features.

for more details: <https://blogshare.000webhostapp.com>

Laser Security Alarm

I made this project during my 1st year , this project was designed in order to ensure more security to college. This project includes LDR (which increses and decreases its resistance on amount of light falling on it), resistance and majorly a speaker.The LDR and laser-light is placed parelly at

a certain distance and when any object comes in between laser-light and LDR ,then it produces security alarm.

My Kitchen (An Android Application)

My Kitchen is an Android Application which can used to order check different food stuffs, go through details and can place different orders as well.The application has Login, Register, List view of Item, add to cart, order summary details.

RELEVANT COURSES

Data Structure, Algorithms, Operating System, Computer Networks, Databases, Computer Architecture, C Programming, Unix Programming, Automata Theory, NLP, Discrete Mathematics.

WORKSHOPS & TRAININGS

- Attended ten days complete workshop on Machine Learning Using Python organised by IIT Guwahati.
